

Team Name: sdmay23-02

Team Members: Noah Peake, Jake Stanerson, Michael Gierak, Conner Spainhower, Cole Medgaarden, Hrijul Balayar

Report Period: 09/22/2022- 09/29/2022

Summary of Progress in this Period

- Break up tasks, to be able to continuously be working on as the project advances.
- User definitions- electrical engineers, civil engineers, technically trained consumers, Corporate users, and regulators.
- Attack taxonomy-false injections, buffer overflow.
- Created a flow chart of sorts to help get a visual idea of the project.

Pending Issues

- **No pending issue as of now we have already met twice and have made things clear except on what specific tasks to divide among the group. However, we are just setting up so have not dived deep yet.**

Plans for Upcoming Reporting Period

- Install Panda Power on Hosts.
 - Get added to the GitHub repo if not already.
 - Finish filling out your sections for the team contract.
 - Create a User Needs doc.
-
